

What is claimed is:

- Sub
a1
1. A frameless window screen system for use in combination with a conventional window frame, the system comprising:

- (a) a screen mesh having side edges;
- (b) a first fastener strip secured to said edges of said screen mesh;
- (c) a second fastener strip secured to said window frame;

wherein said edges of said screen mesh can be aligned with said window frame in a manner that said first fastener strip mates with said second fastener strip to detachably secure said screen mesh to said window frame; wherein said first and second fastener strips comprise hook and loop fasteners.

2. The system in accordance with claim 1, wherein said screen mesh is rectangular.

3. The system in accordance with claim 1, wherein said screen mesh is non-rectangular.

- Sub
a2
4. A combination comprising:

- (a) a window frame defining an opening;
- (b) a screen mesh having a size and shape approximately equal to said opening; said mesh having side edges;
- (c) a first fastener strip secured to said side edges of said screen mesh;

(d) a second fastener strip secured directly to said frame around said opening;

wherein said first and second fastener strips comprise hook and loop fasteners; and wherein said side edges of said screen mesh are aligned with said frame around said opening; and wherein said first fastener strip is detachably secured to said second fastener strip, whereby said screen mesh covers said opening.
